Windows 11 Upgrade Guide

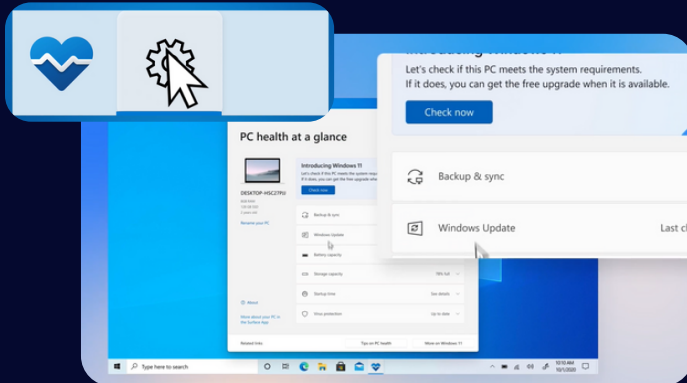

How-to document for your team

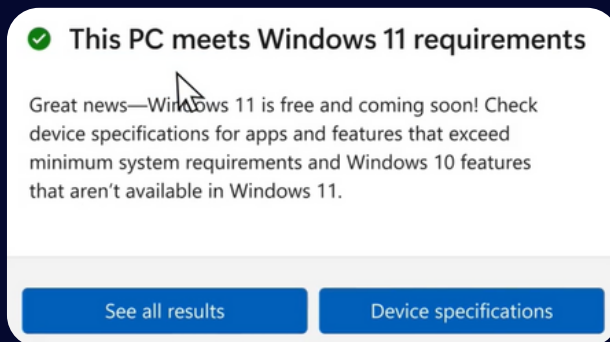

Step 1

Open your OneDrive, and ensure you are logged in, up to date and backed up.

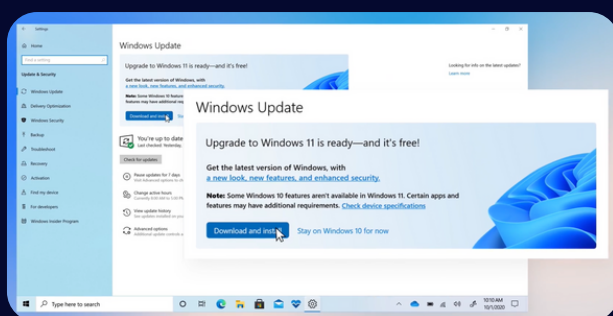

Step 2

Open “Settings” search “Windows Update” and click “Check now”

Step 3

Wait for this check to complete, if your PC meets Windows 11 requirements you can continue.

Step 4

Click “Download and Install” to begin the update on your device.

What if your PC is not Compatible?

There are a few options if your device is not compatible with Windows 11, the first is possible upgrades to your device, if this is not possible then unfortunately the only option is a device replacement.

Speak to a member of our team for support with your upgrade.
